

Environmental Impact Statement (EIS) Required

- An EIS is required when a federally funded project will result in potentially significant impacts to the natural and/or human environment.
- Potential significant impacts include: community impacts, relocations, visual impacts, and changes to the local traffic network.
- Following the release of the Draft EIS, MDOT will hold a formal public hearing.
- After the public hearing, MDOT and FHWA will prepare a Final EIS.
- The Study will conclude with a Record of Decision, which will formally select an alternative for design and construction.

Blue Water Bridge Plaza Study
